EDUCATION

Texas Tech University

Lubbock, TX

Bachelor of Science in Computer Science, Minor in Mathematics and Economics, GPA: 3.09

Expected May 2026

Relevant Coursework: Object oriented programming, Data Structures and Algorithms, Discrete Mathematics, Computer Organization and Assembly Language, Linear Algebra.

TECHNICAL SKILLS

Programming Languages and databases: Python, C, SQL, R, JavaScript.

Machine Learning: Scikit-learn, PyTorch, XGBoost, tensorflow, LightGBM, Optuna, Hugging Face transformers, scrapy, BeautifulSoup, TA-Lib,

Data Analysis and Visualization: Pandas, NumPy, Matplotlib

Databases: PostgreSQL, My SQL, Microsoft SQL Server

Cloud Services: AWS

PROJECTS/RESEARCH

Finance Website Development | JavaScript, Python, SQL, HTML, CSS, AWS|

- Collaborated with team of 3 young professionals to develop a user-friendly website aimed at enhancing budgeting capabilities.
- Developed a website using SQL for the data management, JavaScript for interactivity, HTML and CSS for the UI, Python for the Backend Logic, all hosted on AWS.
- Presented the finance app prototype to a panel of judges, highlighting its features, functionality, and potential impact on personal finance management.

Allerzone | Machine Learning, Python, SQL |

- Developed Allerzone, A data driven app that helps users avoid allergens by scanning product barcodes and analyzing ingredient data.
- Leveraged SQL databases to store and manage user defined allergy profiles and product information.
- Utilized machine learning techniques to provide users with personalized alerts, improving decision-making and safety.

Gold Price Prediction Analysis | Python, Machine Learning Algorithms|

- Analyzed gold price data and identified factors influencing its movement.
- Developed a Random Forest Regression Model to predict future gold prices based on the insights provided.
- Leveraged libraries such as Scikit-learn, NumPy, Pandas, Matplotlib
- Visualized the data distribution using a histogram to understand the patterns.

WORK EXPERIENCE

Webacy

Remote

Data Analytics Extern

July 2024 – Aug 2024

- Engaged in hands on projects focused on identifying and analyzing smart contract vulnerabilities, contributing to the security of web 3.0 assets.
- Developed an expertise in blockchain security by using real world projects.
- Collaborated with a program manager and participated in synchronous and asynchronous training sessions.

LEADERSHIP AND PROFESSIONAL DEVELOPMENT

Management Leadership for Tomorrow

Washington, DC

Career Preparation Fellow

Jan 2024 – Present

- Complete business case studies and assignments to grow leadership and technical skills
- Receive coaching and online instruction to achieve targeted interview, technical, and professional development goals.

Robotics and Advanced Technology Society

Lubbock, TX

RATS Member

Sep 2022 – Dec 2022

- Engaged in hands-on robotics projects, working in teams to design, build and program robots for competitions and demonstrations.
- Participated in technical workshops and training sessions to enhance knowledge and skills in robotics, automation, and emerging technologies.
- Collaborated with multidisciplinary teams, to develop innovative solutions and improve robot performance.
