EDUCATION

Texas Tech University

Bachelor of Science in Computer Science, Minor in Economics, and Mathematics

Lubbock, TX

Aug. 2022 – December 2026

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R

Frameworks: React, Node.js, Flask, WordPress, Material-UI, FastAPI

Developer Tools: Git, Docker, Google Cloud Platform, VS Code, Visual Studio, PyCharm, IntelliJ, Eclipse

Machine Learning: Scikit-Learn, Pytorch, XGBoost, tensorflow, LightGBM, Optuna, Hugging Face transformers, scrapy, BeautifulSoup, TA-Lib

Libraries: pandas, NumPy, Matplotlib

EXPERIENCE

Webacy

July 2024 – Aug 2024

Webacy

Remote

- * Analyzed smart contract vulnerabilities, enhancing blockchain security.
- * Gained blockchain security expertise through practical projects.
- * Collaborated with program manager, attended training sessions.
- * Conducted in-depth analysis of smart contract vulnerabilities, enhancing security protocols and safeguarding web 3.0 assets.

PROJECTS

Braze | *React, TypeScript, Tailwind CSS, Next.js, GPT-4, Claude, Gemini APIs*

March 2025

- Braze bridges siloed AI workflows, empowering users to collaborate across multiple LLMs for research, writing, and creativity while maintaining context. It offers a unique advantage for professionals working with token limits, contrasting opinions, or iterative AI processes.
- Developed a modern frontend using React and Next.js, featuring a collapsible sidebar, dark/light mode, and a tab system for switching between AI agents.
- Connected to all three AI APIs with secure backend routes, and used state management to keep track of each project's memory and progress.
- Designed a chat UI that adapts to light or dark mode, supports smooth transitions, and keeps conversations consistent across sessions.

Scalier | *Python, FastAPI, Next.js, Machine Learning, LLM APIs*

April 2025 – June 2025

- Scalier provides founders with an intelligent co-pilot for scaling, leveraging patterns from past startup successes and failures to boost decision quality. It democratizes strategic consulting for early-stage ventures.
- Built key features like strategy simulation, capital planning, and business model testing using Python and FastAPI.
- Combined business data with social trends to help the AI give smarter recommendations over time.
- Organized the platform into 2 parts: Advisor (AI), and Sync (real-time data tracking) making it modular and easy to scale.

FinanceBuilder | *JavaScript, Python, SQL, HTML, CSS, AWS*

April 2024

- The project highlighted gaps in budget tools for young users and introduced an intuitive solution that simplifies money tracking and financial goal setting.
- Developed a website using SQL for the data management, JavaScript for interactivity, HTML and CSS for the UI, Python for the Backend Logic, all hosted on AWS.
- Presented the finance app prototype to a panel of judges, highlighting its features, functionality, and potential impact on personal finance management.
